Early Childhood Care and Education Program

Details of the program:

It is a six month certificate course offered by the institute. The current course started from 20th Feb and will end on 17th June. The classes are conducted on Saturdays from 9:00 am to 1:00 pm.

Purpose of the program:

The purpose of this program is to help the teachers of Early Childhood schools to engage them in “Active Learning Experiences” and to apply these understandings in their classrooms.

Requirement:

Minimum qualification: Intermediate

Current status: Working at ECE level

What will the participants learn?

The participants will…

- Demonstrate an understanding of how children learn and use this knowledge in their particular classrooms to plan student learning outcomes through active learning experiences.
- Plan and set up learning environment and routines for the classrooms.
- Use different approaches of teaching, such as play and inquiry in early childhood education.
- Use a variety of strategies and design activities to develop children’s reading and writing skills.
- Use a variety of strategies and design activities to develop children’s numeracy skills.
- Prepare low cost teaching material for children in their particular classrooms.
- Apply their knowledge of key learning areas (subject knowledge) in their teaching and learn new approaches/ in-depth knowledge.
- Design age-appropriate creative art projects to stimulate children’s creativity.
- Assess individual children’s progress through a variety of strategies including observations, record keeping, collaboration with parents, and meeting individual needs.
- Build partnerships with parents and the community to support children’s learning.
Course Content:

The course is divided into five major areas:

1. **Understanding “Child Development” and “Learning”**

A big emphasis was given on this area as it covered how children grow and develop physically, mentally, socially and emotional and its implication for learning.

2. **Setting of “Learning Environment”**

This course focused on the importance of the learning environment and the daily routines. Participants were trained how to set up the physical environment (learning corners) in the classroom followed up by development of low cost material that had to be kept in the learning corners. Designing and implementation of daily routine was also a part of this.

3. **Early Childhood Curriculum and Pedagogies**

The participants were introduced to the National Curriculum framework of Pakistan. They were asked to work on thematic unit plans by focusing the ELOs from the national curriculum. Participants were also introduced to the different curriculum approaches followed in other parts of the world.

4. **Assessment in the “Early Childhood Classrooms”**

Different assessment strategies were introduced which included observations, record keeping and portfolio to assess individual student’s progress.

5. **Partnership with Parents**

This course also focused on building partnership with parents and the community to support children’s’ learning.
Facilitators:

**Dr. Audrey D’Souza Juma** is Director at Notre Dame Institute of Education and Honorary Fellow at the Youth Research Centre at the University of Melbourne.
